PROFESSIONAL SUMMARY

BSIT candidate with hands-on experience in full-stack web development, IT support, and technical troubleshooting. Skilled in building responsive web applications using React, TypeScript, PHP, MySQL, and Tailwind CSS, with experience developing role-based dashboards, database-driven features, and management systems. Completed 486 hours of IT support training at Our Lady of Fatima University, resolving hardware, software, printer, driver, and network-related issues. Strong background in troubleshooting, documentation, and practical system development.

SKILLS

- **Front-End Development:** Experienced in building responsive and user-friendly web applications using React, TypeScript, JavaScript, HTML, CSS, and Tailwind CSS. Capable of developing clean, maintainable, and mobile-friendly interfaces.
- **Back-End Development & Database:** Knowledgeable in using PHP and MySQL to build basic back-end logic, connect databases, create schemas, and support dynamic web application features.
- **API Integration:** Capable of integrating front-end interfaces with PHP APIs and handling data flow between the user interface and database.
- **UI/UX Implementation:** Skilled in creating clean, organized, and user-friendly layouts with attention to usability, responsiveness, and visual consistency.
- **IT Support & Troubleshooting:** Experienced in diagnosing hardware, software, operating system, driver, printer, and connectivity issues through hands-on troubleshooting and system testing.
- **Tools & Development Environment:** Experienced in using Git, GitHub, VS Code, MySQL Workbench, Figma, Jira, HTML & CSS tools, and modern development workflows for project building and collaboration.
- **Game & Interactive Development:** Capable of developing basic interactive applications and game systems using Unity and C#.
- **AI-Assisted Development:** Experienced in using GPT-Codex, Claude, Gemini, and Antigravity to support coding, debugging, problem-solving, documentation, and development workflows while maintaining clean and understandable code.
- **Problem Solving & Debugging:** Strong analytical and troubleshooting skills in identifying issues, testing solutions, documenting fixes, and improving system reliability.

PERSONAL PROJECTS

ireaching.github.io/grad-portfolio/#projects

PORTFOLIO - A single-page resume site built with Vite, React 19, and Tailwind CSS 4. Live at ireaching.github.io/grad-portfolio

CONDOLINK (Capstone) - Responsive web app for condominium residents and staff, including dashboards for announcements, amenity bookings, and maintenance requests. Built using React, TypeScript, PHP, MySQL, and Tailwind. Live at condolink.click

EDUCATION

Bachelor of Science in Information Technology (BSIT)

2022 - 2026

Pamantasan ng Lungsod ng Valenzuela

- Expected graduation in 2026, with coursework and projects focused on web development, networking, and tech support.

EXPERIENCE

Full-Stack Developer & Project Lead - CondoLink Capstone Project

Dec 2024 - Apr 2026

Pamantasan ng Lungsod ng Valenzuela

- Led the development of CondoLink, a responsive condominium management system for residents, staff, guards, and administrators.
- Built front-end dashboards using React, TypeScript, and Tailwind CSS for bookings, reports, announcements, and entry logs.
- Developed PHP back-end logic and connected MySQL database tables to support dynamic system workflows.
- Implemented role-based access and user-specific features for different system users.
- Managed project planning, feature development, testing, debugging, and final delivery.

OJT – IT Support

Jun 2025 - Oct 2025

Our Lady of Fatima University

- Completed 486 hours of hands-on technical support in a university IT environment.
- Diagnosed and resolved hardware, software, operating system, driver, printer, and network-related issues.

- Assisted with device configuration, system maintenance, software installation, and troubleshooting for staff and users.
